

WhiteAway 60

from the Makers of
InnerCrete™ Membrane Technology

EFFLORESCENCE REMOVER

WhiteAway is a specially formulated, VOC Free efflorescence remover used to dissolve efflorescence (whitish residue) and remove ground-in dirt and stains from concrete surfaces. When used in conjunction with VersaGuard or DualGuard (as a secondary treatment), efflorescence is first removed and then prevented from recurring on the surface.

PRODUCT DESCRIPTION:

WhiteAway - from the Makers of InnerCrete™ Technology, is a new and advanced efflorescence remover. It contains no hydrochloric (muratic) acid so it will not damage delicate surfaces. **WhiteAway** is a safe choice for heritage or sensitive substrates. Damage that can result from using harsh blasting removal or high PSI water processes is avoided.

RECOMMENDED USES:

WhiteAway can be used on indoor/outdoor, vertical and horizontal concrete surfaces. **WhiteAway** is easy to use; it is applied using a garden sprayer. **DO NOT ATOMIZE.**

WhiteAway is fully biodegradable. It effectively removes efflorescence, ground-in dirt and stains from:

- Concrete
- Cement-based materials
- Slabs
- Brick
- Pavers, patios and driveways
- Retaining walls

WhiteAway penetrates deep into the substrate without damaging the surfaces. It cleans evenly and brightens up old, stained or discolored surfaces. **ALWAYS TEST A SMALL AREA FIRST.**

EFFLORESCENCE REMOVAL & PREVENTION:

First, use **WhiteAway** to dissolve efflorescence and remove ground-in dirt and stains from concrete. Surfaces are now cleaned and prepared. **Second**, treat the surface with **DualGuard** or **VersaGuard** to waterproof and protect the concrete and prevent future efflorescence from occurring.

FEATURES:

- Fully biodegradable
- Contains no hydrochloric acid so will not damage surfaces
- VOC Free
- 2-in-1 product: efflorescence remover & concrete cleaner
- Low pH
- Easy to use with very little mess
- Step 1 of a 2-step system to clean and prevent recurrence of Efflorescence.
(Step 2: VersaGuard or DualGuard)

COVERAGE:

200 Square ft/ 1 US gallon
(Based on 1 gallon of UNDILUTED product)

DILUTION RATE:

Use at full strength for heavy efflorescence and stains, dilute 1:1 with water for light duty removal.

PACKAGING:

1 US gallon (3.78L) jug
5 US gallon (18.92L) pail

SURFACE PREPARATION:

Always test a small hidden area first. Apply in temperatures above 5°C. Do not apply under blazing sun as this will cause the product to dry out. Product can be applied to damp or dry but not saturated (pooled water) surfaces. All glass, plants, woods, and delicate, non-masonry surfaces should be properly protected from overspray of **WhiteAway**.

APPLICATION & DWELL TIME:

WhiteAway is applied using a garden sprayer. DO NOT ATOMIZE. Do not apply with a mop or roller. **WhiteAway** can be applied on wet surfaces. Wear rubber gloves and safety goggles. Spray surface with product until totally saturated. Heavy efflorescence may require agitation with a stiff brush. Product should be left on for at least 15 minutes, but no more than 30 minutes, to properly dissolve the efflorescence. Check product often. If product dries on the surface, reapply product.

Once removed, if efflorescence or stains still remain, reapply more product and repeat the process.

REMOVAL & CLEANUP:

Agitate the stubborn efflorescence if necessary. Use a pressure washer to remove residue and product. Continue washing the surface until no foamy residue remains. This step will properly neutralize the product so that it can be rinsed away without special disposal. If any efflorescence or staining remains, repeat the above steps.

PREVENTING THE RECURRENCE OF EFFLORESCENCE:

Once the surface is totally rinsed and completely cleaned of efflorescence and ground-in dirt treat the concrete with either VersaGuard or DualGuard (depending on application). Both of these products incorporate InnerCrete™ Membrane Technology, which create an internal, impermeable membrane within the concrete. This InnerCrete™ Membrane effectively stops the chemical reaction that causes efflorescence to form, thereby preventing the recurrence of visible efflorescence at the surface.

STORAGE:

WhiteAway should be stored in a cool, dry environment. Extended storage above 35°C will reduce products efficacy. Protect from freezing, heat and direct sunlight. All containers must be properly sealed when stored.

HANDLING & DISPOSAL:

WhiteAway is fully biodegradable. Neutralizing and dilution with water will be required to meet local waste disposal requirements. Seek advice from local authority before disposal. Spills must be contained and disposed under the same requirements. Containers must be secured during transport to prevent damage. Lids and closures must be tightened during transport and storage to avoid spillage.

HEALTH & SAFETY:

Always thoroughly read all product material before using the product. Do not alter, mix or dilute this product with other chemicals. CONTENTS ARE CORROSIVE, CAUSES EYE AND SKIN DAMAGE. FUMES ARE DANGEROUS, AVOID BREATHING IN. Do not swallow. Do not get in eyes or on skin or clothing. Keep out of reach of children. Wear protective clothing, a mask, rubber gloves and safety goggles. Use only in well ventilated areas. **FIRST AID TREATMENT:** If swallowed, call a Poison Control Center or doctor immediately. Do not induce vomiting. If person is conscious, give large quantities of water. If in eyes, flush well with water for 15 minutes. If on skin, rinse well with water. If on clothes, remove clothes. If breathed in, remove person to fresh air.

PHYSICAL PROPERTIES:

Color, Odor: Clear, odorless
pH: (as supplied) approximately 2 -3
Viscosity: < 1000 cps at 25°C
SF: (H₂O) = 1) 1.03 at 20°C
Flash Point: n/a
